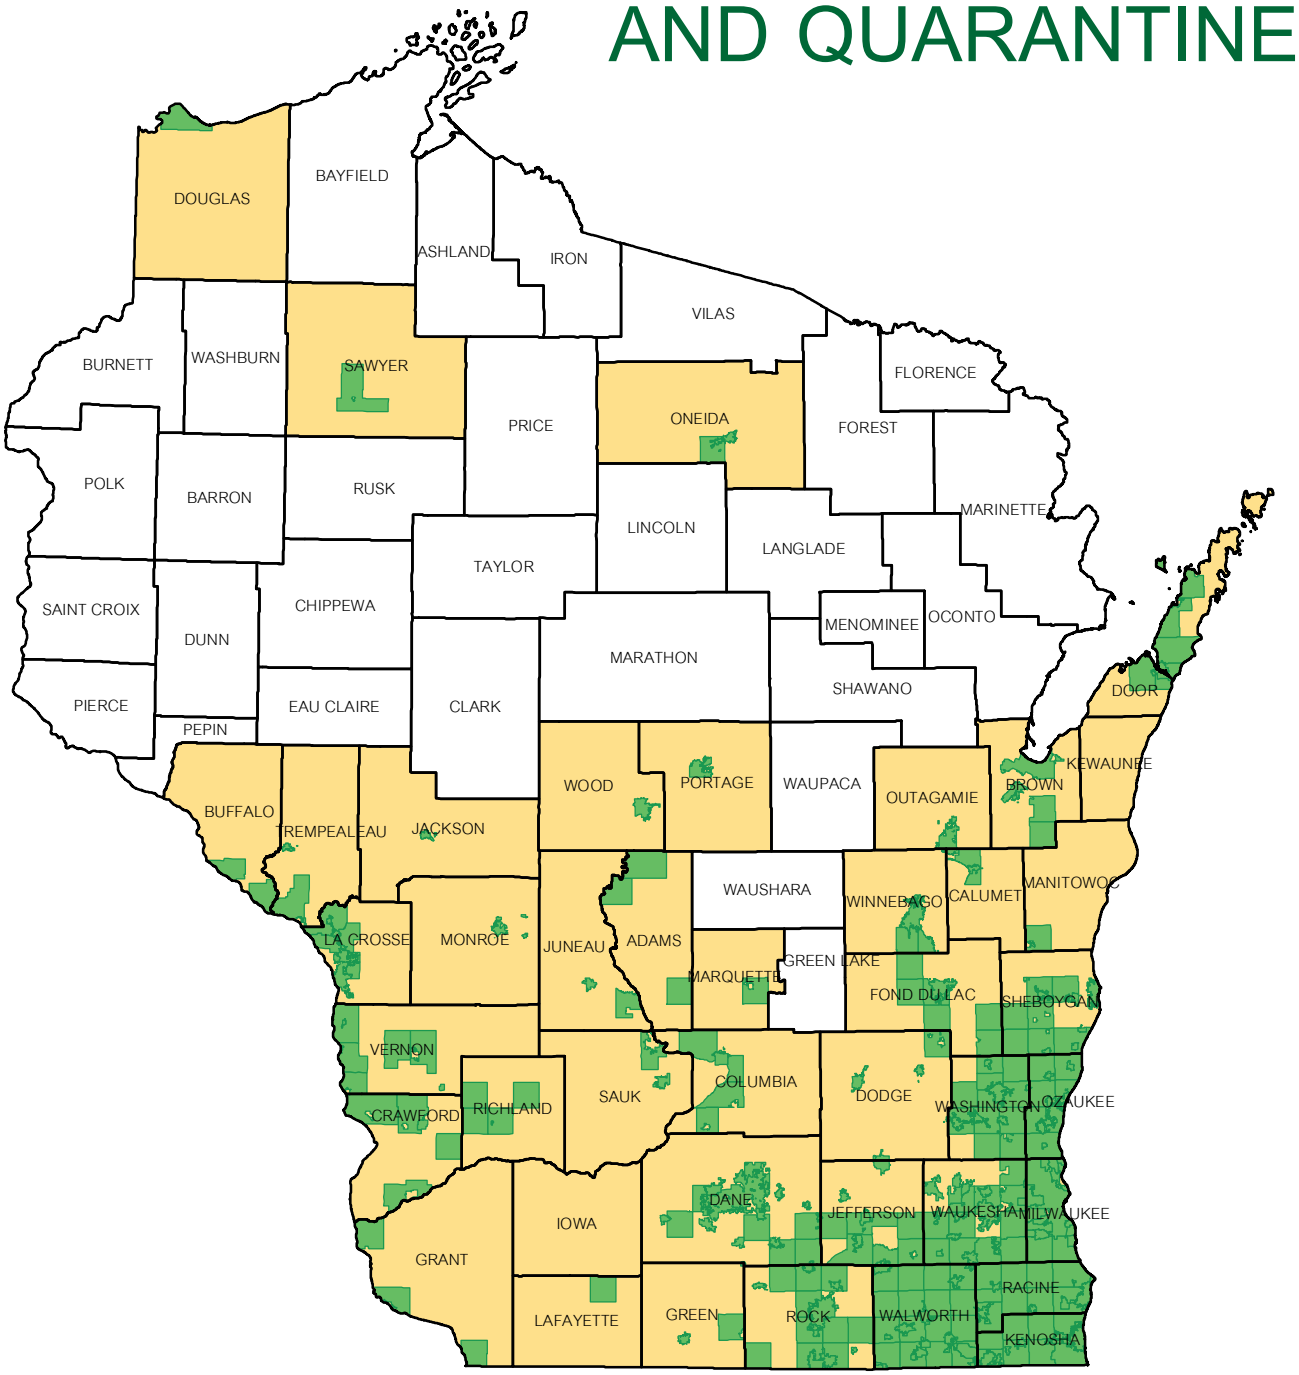
EMERALD ASH BORER DETECTIONS AND QUARANTINE IN WISCONSIN



Most of Wisconsin is EAB-free, including most of the northern half and the yellow areas in all quarantined counties. EAB has been confirmed only in those cities, villages and townships colored dark green. By following quarantine rules and limiting the transport of ash wood and all firewood, we can slow down EAB's spread to the northern forests and un-infested communities in the south. Visit *www.emeraldashborer.wi.gov* for information on what you can do.

- Non-Quarantined County, No EAB Detections
- Quarantined County
- EAB Confirmed Area in a Quarantined County
