

**One of these firewood piles is infested with Emerald Ash Borer.**

***Can you tell which one?***

**Most people can't. So please  
KEEP FIREWOOD LOCAL!**

- Emerald Ash Borer (EAB) lives hidden beneath the bark of ash trees and can be transported in firewood.
- Due to the discovery of EAB in Wisconsin, firewood quarantines are in place in several areas. Visit [www.emeraldashborer.wi.gov](http://www.emeraldashborer.wi.gov) for the latest information.
- Hardwood firewood may not be moved out of the quarantine area.\*
- Stop moving firewood within the quarantine areas, or anywhere in Wisconsin, to help slow the spread of EAB or other pests and diseases.

*\* Firewood certified by DATCP may be moved within Wisconsin. Certification available for businesses only.*

***Buy it where you burn it!***
